The public is invited to attend an educational seminar on beekeeping. Various aspects of beginning beekeeping will be studied including bee hive equipment, hive management, bee disease control, sources of nectar and pollen and honey harvesting and packaging.

This course will be conducted by experienced Memphis area beekeepers who are members of the local and state beekeeping associations. These presenters collectively have many years of beekeeping experience and they will provide a first class opportunity for you to learn about the honey bee.

Those attending the course will receive educational materials, and hands-on instruction. The \$10 cost includes the first year's membership in the local beekeepers association. Lunch and refreshments will be provided.
